

# Font Styling in our Personal Site

September 25, 2020

## TIP

if the parent of an absolute element isn't relative, then the element gets its layout relative to the body

## TIP

changing the font style and size, will affect the page layout

fonts

sans-serif+serif: for typical usage / monospace: for coding  
/ cursive + fantasy: never use!!! not easy to read

## TIP

default font is serif

## TIP

font-family: font1, font2. the priority is with font1, but if the browser didn't have font1, it will use font2

Safe fonts

fonts that most browsers support

## TIP

no font is 100% safe

## SITE

cssfontstack.com  
fonts.google.com

## TIP

to make the safe percentage 99, we should embed our language using google font site
