

CSS Sizing

September 25, 2020

TIP

100% = 16px

em

is used for browsers to be able to change the appearance according to default browser settings

TIP

when using dynamic font sizing, the font size gets inherited. which means that they are added up with their parent element

rem

used when we don't want the size being added up with the parent element (root em)

TIP

use rem for sizing
