Absolute Positioning

September 25, 2020

absolute

position the element according to its parrent element

TIP

in absolute positioning, the element, doesnt take up any space. so its like no other elements see it. in comparison to relative position, the ghost space left from moving the element doesnt exist in absolute pos.

TIP

for absolute position to work, the parent element must have relative positioning

TIP

for 0 value, px or em can be not used

fixed

so that when you scrol down, it is in its fixed place
